

Steps for deployment -

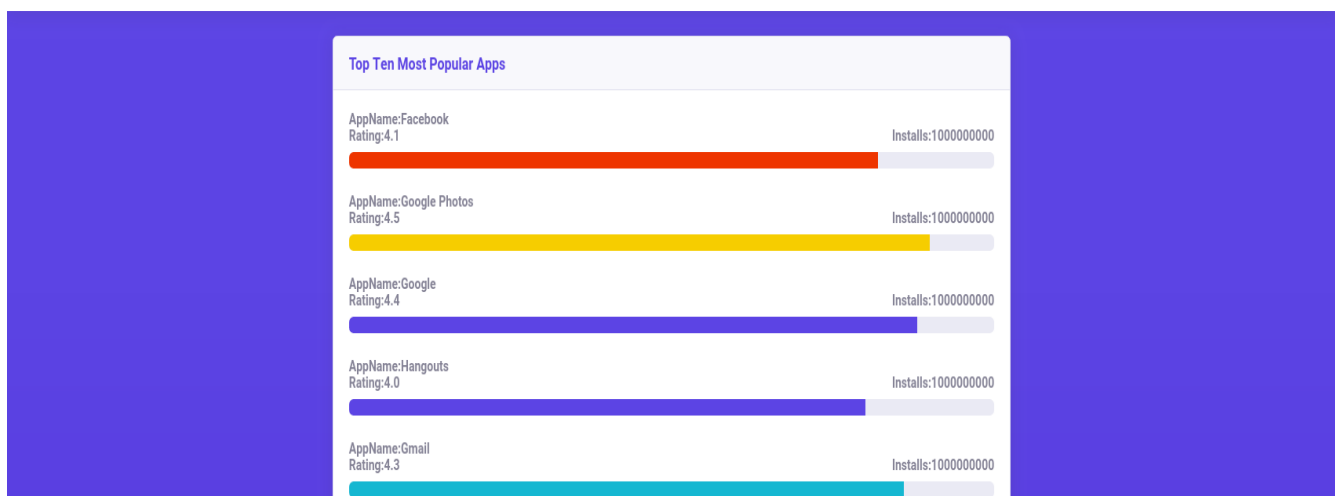

1. Extract the contents of “project.zip” file in a folder.
2. In the project folder, open the “Python_Proj_Final.ipynb” file in jupyter and run all the cell blocks *until the last cell*.
3. Now run the last cell block in the code. You will see an address where the application is running as shown below-

```
* Running on http://localhost:9000/ (Press CTRL+C to quit)
```

4. N

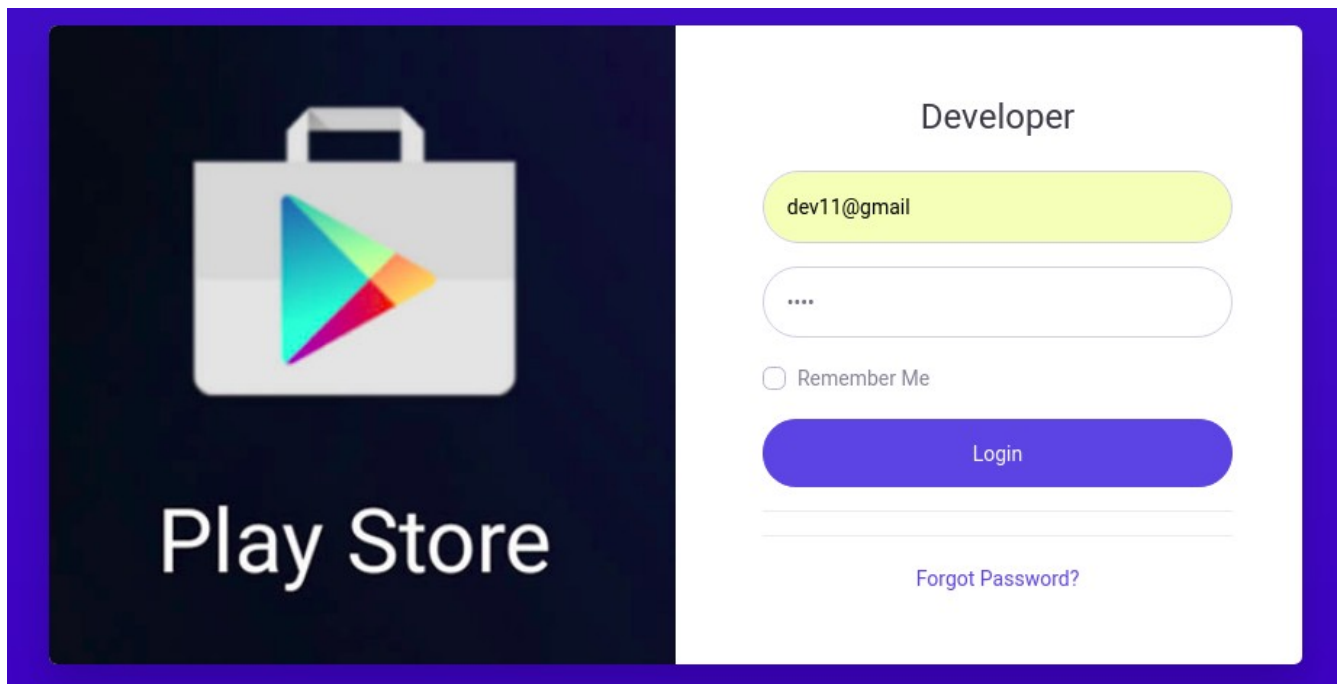

ow, copy this address and open it in a new tab. You should now see the running application as shown below-

PLAY STORE APP ANALYSIS Home Developer

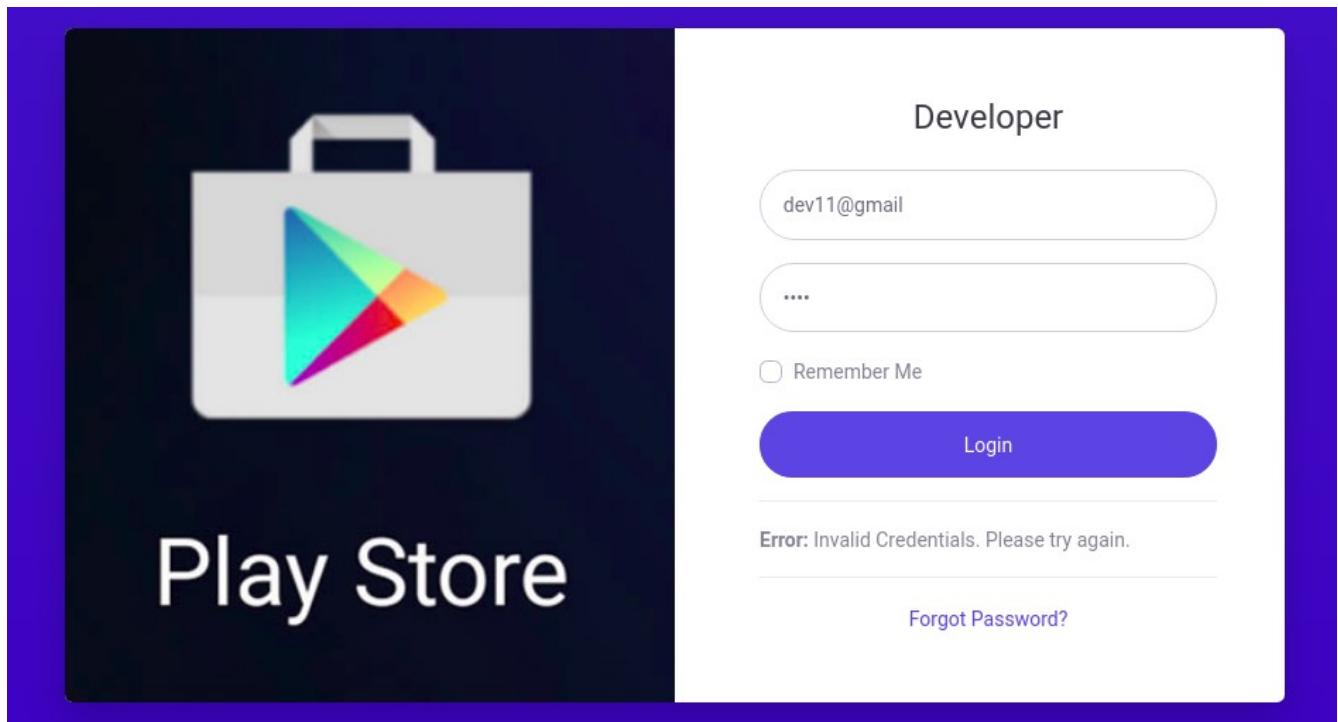

Steps for Testing-

1. As you open the application, the “Top 10” applications can be viewed.
2. In order to view the developer dashboard, the following dummy developers are available with there respective Id and password as mentioned below-
 - a) Developer 1 – Id: [dev11@gmail](mailto:dev11@gmail.com) Pwd: 1111
 - b) Developer 2 – Id: [dev12@gmail](mailto:dev12@gmail.com) Pwd: 2222
 - c) Developer 3 – Id: [dev13@gmail](mailto:dev13@gmail.com) Pwd: 3333

3. You can also try entering a different Id or password. It should give an error.

4. Once you have entered the correct Id and password, you should be able to view the dashboard as below-
